Left column

foo bar lorem ipsum etc

you could have any kind of text here

this layout isn't very good without some page adjustments. if you want ideas, check out [xenua_cv.typ](#)

the main changes there are smaller page margins, a different font, a few show rules to make a more interesting theming, and a better header layout.

you can create your own template, or just do everything in one file, who am i to judge

Aaaaand, right column

woah such text, much wow

another heading

maybe even use a library function, like this?

Expert Shitposter ever since the dawn of time, in this and other universes

🔗 [space.time/shitposter](#)

i worked at the space time foundation as an expert shitposter, bla bla, capitalist pleasing writing here
